

Amendment to the Specification

Please amend paragraph [0022] at line 21 of the Specification, as follows:

The first amusement device 14 has a video touchscreen 15a, a controller U1 and a memory U2. The first amusement device 14 also includes a currency input device (not shown) for receiving currency for operating the first amusement device 14. As described above, currency may include coins, paper money, credit/debit cards, or the like. Other amusement devices in the system may also include currency inputs for respective operation. The second amusement device 16 has a controller U3 and a memory U4. The second amusement device 16 may optionally include a video display or video touchscreen 15b. The third amusement device 19 has a video touchscreen 15c, a controller U5 and a memory U6. The second amusement device 16 is coupled to the first amusement device 14 and the third amusement device 19 by the communication link 12, and the first amusement device 14 and the third amusement device 19 communicate with the second amusement device 16 using the communication medium 13, and vice versa. Likewise, the third amusement device 19 is coupled to the first amusement device 14 for communicating using the communication medium 13, and vice versa, as well. Preferably, communications between the first, second and third amusement devices 14, 16 and 19 is bidirectional, but need not be. Furthermore, the amusement device communication system 10, as shown, links three amusement devices 14, 16, 19, but the amusement device communication system 10 could link a greater number of amusement devices as would be clearly recognized by one skilled in the art.
